- Triple stainless steel down haul poolies
- Thermoform mast protector

CONSTRUCTION

- Monofilm sail
- Kevlar mast panel

X.O SAILS ADVISE

The VEGA is easy to trim, the sail should be rigged like a camber slalom sail, best on SDM 80% mast the sails will also work on 100% mast to optimize performance and 60% for lighter sailors, with SDM mast the sail have the draft locked forward, while using RDM mast will make the sail more friendly use in maneuvers
