- Wave sail with moderate power, suits any wave board and use in side to side on shore conditions
- Full grid sail, Extremely durable even in intensive use
- Moderate to powerfull power, depending on the mast (100% carbon mast delivers the most power)
- Really easy to handle, this sail is ideal in side shore conditions
- 4 battens sail

EQUIPMENT

- Kevlar mast pannel to lock the shape
- Strap tensioner on the outhaul
- Head PVC protection
- PVC batten end protector
- PVC anti-rubbing strip on lower batten pocket
- Velcro scratch on mast protector for easy access
- Triple stainless steel down haul poolies
- Thermoform mast protector

CONSTRUCTION

- Full grid
- Kevlar mast panel & reinforcement

X.O SAILS ADVISE

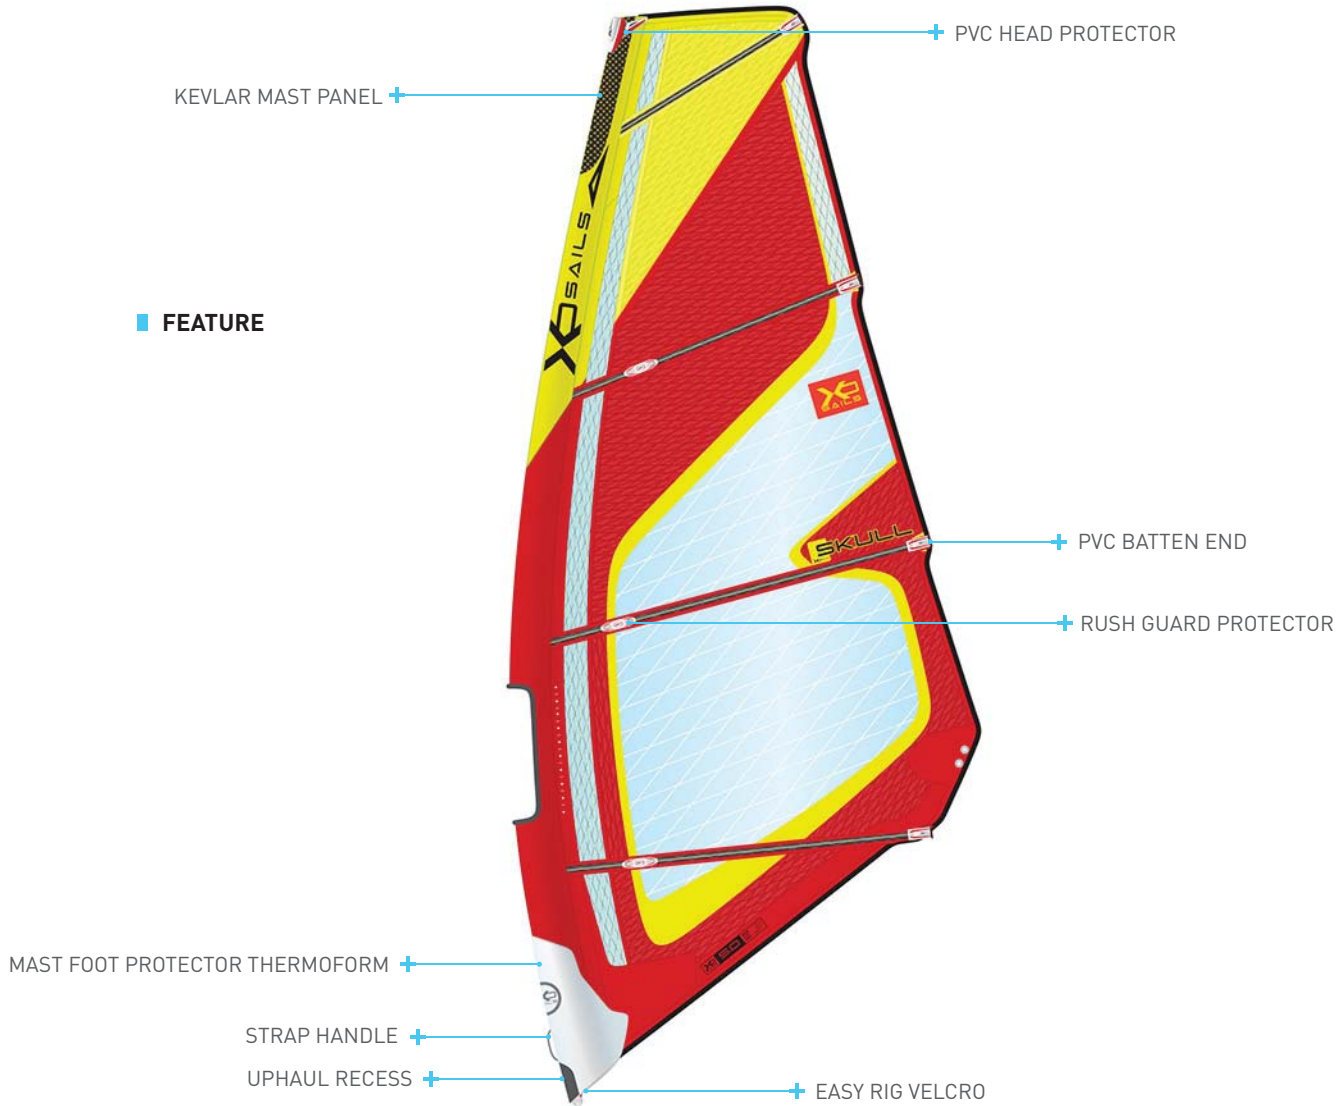

The SKUL is an excellent side shore wave sail, recomended mast for light sailors will be 80% carbon, with a 100% carbon you will get more leach tension and draft locked forward, in this option the sail will offer better planning ability and more control for heavier sailors
